

Real-world scenarios without the hardware investment

Practice-IT labs give your students a task-based learning component in a safe environment that helps them gain confidence and practical experience without a costly investment in hardware. Whether employed as part of a self-study regimen, integrated into classroom study or used for test preparation, Practice-IT labs offers students and instructors a bridge over the critical gap between theory and application. All you need is a standard web browser.

VMware lab hardware

Practice-IT labs for VMware are designed to mimic real-world scenarios by providing access to hardware that allows users to both configure and test their work — providing valuable feedback on the impact of the configuration. With topics that include virtual networking, managing virtual machines and managing cluster configurations, among others, the browser-based administrative access to the virtual infrastructure gives users complete control to follow the lab guide or implement their own configurations for a broad range of virtualization techniques and applications.

Example Lab: VCADCY - VCP5-DCV Data Center Virtualization (5.5)

VMware Data Center Virtualization (5.5) Lab	VMware Certified Professional Cloud Lab
1 x AD Domain Controller	1 x AD Domain Controller
1 x Virtual Center Server	1 x Virtual Center Server
2 x VMware ESXi 5.5 Servers	2 x VMware ESXi 5.5 Servers
1 x VMware ESXi 4.1 Server	1 x VMware vCloud Director Server

Lab courseware

Lab guides are complete and thorough, covering a range of topics from basic through advanced concepts, with each topic containing a set of configuration or administration instructions; showing the user how to achieve the expected result. Courses contain the steps and access to pre-configured equipment, allowing users to bypass configuring a set of pre-requisites and simply start on the topic they choose. This approach clears distractions and allow users to completely focus on the lesson topic rather than working on the required set-up before beginning a task.

2015 course list:

VCP550: VMware Certified Professional 5
– Data Center Virtualization

VCPD510: VMware Certified Professional
– Desktop

VCPC550: VMware Certified Professional
– Cloud 5

VCP510: VMware Certified Professional
– vSphere

Practice-IT labs fit easily into your curriculum and your student's study plan

- A wide range of VMware standard technologies available
- Instructors and students can follow an exam path or design a personal learning experience
- Unlimited access from any device removes time and accessibility constraints
- Break and Reset functionality allows the user to reset and start over with the click of the button — eliminating the fear of making mistakes
